3dtotal's Anatomical Collection

Since the launch of 3dtotal's first male anatomical reference figure in 2013, development on a complete range of affordable figures has been underway. The collection aims to offer everyone a chance to own a quality anatomical reference figure without paying the heavy price-tag usually associated with the privilege. The 11-inch male anatomical reference figure features an athletic build in a neutral pose, and is cast in grey resin to make the variation in the surfaces and directional flow of the muscles visible and easy to understand. He's the perfect desktop reference for 3D, 2D and traditional artists alike.

A female anatomical figure is in the making and will be available in 2014. Register your interest at www.3dtotal.com/anatomy-figure/female
